EDUCATION

Harvard University Graduate School of Design (GSD) *Aug 2025 – May 2027*
Master in Design Studies (MDes), Publics Domain
Cross-registered at MIT: Media Lab AI Studio (agentic web; agents as products and products for agents) and Art, Culture + Technology (critical artistic practice and practice-driven theory)
Focus: Product & Service Design, AI Infrastructure, Agentic Web, Public Policy, Data Analysis & Visualization, Behavioral Economics

University College London (UCL), Institute of Education *Sep 2021 – Jul 2024*
BA Education Studies(Social Science), First Class Honours · GRE 329 (V164/Q165)
Focus: Sociology, Research Design, AI Literacy, Multimodality, Quantitative & Qualitative Methods, Cognitive Science, Communications

CORE STRENGTHS

- **Product judgment:** translate across domains, extract structure from messy input, and weigh user pain against AI limits to cut a testable MVP.
- **Frontier AI practice:** adopt new models, infra, and tools early, learn the theory while building, and turn them into multi-agent, cross-modal products.
- **Cross-functional translation:** move between what users need, what tech can do, and what the business can sustain, in each function's terms.
- **Pitch and narrative:** frame the same tradeoff for a founder, an engineer, and an investor, each in terms of what they care about.

EXPERIENCE

Harvard University Graduate School of Design *Research and Teaching Assistant* *Cambridge, MA; Oct 2026 – Present*
- Organize student case studies on community ownership of land and housing into a reusable course archive; run Canvas and speaker logistics.

Bangkok Art and Culture Centre *Research Assistant, Product Design & Engineering* *Bangkok, Thailand; Mar 2026 – Aug 2026*
- Built a 60-year property-rights database from land registries, litigation records, media, and field interviews, tracing risk and fund flows.
- Designed a multi-agent oral-history pipeline that auto-flagged privacy- and legal-sensitive content and turned testimony into structured evidence.
- Turned 9 stakeholder storylines into an interactive game; delivered a trilingual digital archive and an AI-generated simulation video for the exhibition.

Curiooworks *Learning Experience and Product Designer* *Shanghai, China; Apr 2025 – Jul 2025*
- Partnered with the Pudong Urban Planning Exhibition Hall to translate systemic urban issues into participatory public-education products.
- Designed instructional curricula and teaching tools; conducted user research and iterated based on feedback.
- Owned social media strategy and content production, reaching urban-planning practitioners, policy researchers, and the public.

Educators' Republic *Instructional Training Course Designer* *London / Shanghai (hybrid); Oct 2024 – Jan 2025*
- Designed and delivered teacher training on performance-based assessment: building performance tasks and giving targeted feedback.
- Trained teachers to build assessment-assistant agents with databases and structured prompts (goals, criteria, observation points).

ECADI (East China Architecture Design & Research Institute), Innovation Center *Design Assistant* *Shanghai, China; Jul 2024 – Oct 2024*
- Distilled policy and requirements for municipal projects (Shanghai Port Tower; China University of Petroleum lab) into decision-ready analytical frameworks and materials.
- Reverse-engineered international innovation-network models as evidence for the think tank's cross-agency urban-governance strategy.

Shanghai International Film Festival, Project Market Coordination Assistant *Shanghai, China; May 2023 – Sep 2023*
- Designed a weighted-scoring, dynamic-matching model to coordinate 643 producer–investor pitch meetings, balancing creative quality, commercial potential, and policy constraints; codified SOPs from live feedback.

WPP (GroupM · Mindshare · L'Atelier, LVMH) *Media Strategy Intern* *Shanghai, China; Jul 2022 – Sep 2022*
- Delivered media and consumer insight for Tencent × Nintendo Switch's China market-entry strategy, informed by behavioral and channel data.
- Built a cross-channel audience-segmentation database for luxury clients, translating data into consumer insight and campaign strategy.

Off The Curriculum *Education Officer* *London, UK; Oct 2021 – Sep 2022*
- Led the development and enhancement of the Accreditation section, ensuring courses met rigorous academic and teaching standards to provide high-quality learning experiences, facilitating inter-college collaboration around University of London federation to connect first-generation high school students gain early exposure to higher education environments and university-level resources.

The Bloomsbury Theatre, UCL *Production Manager* *London, UK; Sep 2023 – Jun 2024*
- Managed production support and stage management for performances, coordinating props, set preparation, actors, stage crew, theater staff, and school communications.
- Supported front-end preparation and backstage execution, ensuring materials, teams, and venue requirements were aligned.

Additional: KID Design, curriculum design & teaching; design project mentoring (2024–25); Harvard China Education Forum, event facilitation and resource coordination (2025); Broncos Basketball Community, manager: 30+ inter-school games, GBP 1,000 in funding raised (2020–24)

SELECTED PROJECTS

Echo, Privacy-First Civic Product · HKS Product Management and Society *Product Lead* *Sep 2026 – Present*
Wrote the full PRD for a product that helps people affected by a federal rule file evidence-based public comments anonymously and hear back on the agency's response; scoped V1 to international students and the DHS duration-of-status rule.

Set evaluation and launch criteria for AI features: no-ghostwriting and ID-detection tests before every release, editor verification of every AI match, and an "informed decision rate" north star with zero-tolerance privacy guardrails.

MIT NANDA Town, Agent Referral Infrastructure · MIT Media Lab AI Studio *Project Facilitator & Agent Builder* *Sep 2026 – Present*
Driving a pre-hire referral and verification layer for agents: its business and operating models, and a downstream path into agent infrastructure.

Building the agents hands-on and designing the runtime architecture underneath them.

Roll-Up®, AI EdTech Venture *Founder & Project Lead* *Sep 2024 – Feb 2025*
Mapped educator pain points onto LLM/agent-fit workflows; synthesized personas, journeys, information architecture, and growth loops. Prototyped in Figma, produced a concept video, and ran Wizard-of-Oz tests with real learners.

Harvard i-lab, HealthTech Venture *Product & Strategy* *Jan 2026 – Jun 2026*
Built wearable prototypes and go-to-market strategy; researched AI's boundaries in clinical settings (data governance, privacy, workflow fit); shipped an MVP validating features and commercialization paths.

AI-Enabled Organizational Optimization, Building Management Client *Solution Designer & Platform Builder* *Feb 2026 – Jun 2026*
Diagnosed feedback lag and cross-team coordination costs; weighed process redesign against hardware upgrades on cost, speed, and organizational resistance, then designed an AI governance platform with real-time dashboards that turn complaints into leading indicators.

Participatory Design, Public Wish-Making Platform *Experience Designer & Full-Stack Developer* *Feb 2026 – Jun 2026*
Designed the end-to-end experience (activity flow, environment, and touchpoints), then built a cross-modal pipeline that OCR-digitizes handwritten wishes, classifies them, and cross-references news coverage to surface public-interest themes.

Public Space & Policy Research, Global South *Strategist* *Oct 2025 – Jan 2026*
Built a five-dimension phased strategy and used vision-language models to generate scenario visuals for the client report.

Skills: Product strategy · Experience design · Prototyping · Multi-agent architecture · Multimodal models and applications · Explaining technical concepts to non-technical audiences. AI building: Claude Code, Codex, Cursor, OpenClaw, Hermes, Ollama, Lovable, Base44 · Design & 3D: Adobe CC, Figma, Rhino, SketchUp · Generative media: Midjourney, Runway · Data: Airtable, QGIS
